

INFORMATION DISCLOSURE CITATION

(Use several sheets if necessary)

Docket Number (Optional)

P-6149

Application Number

09/779,237

Applicant(s)

Botha et al.

Filing Date

02/08/2001

Group Art Unit

1616

*EXAMINER
INITIAL

OTHER DOCUMENTS (Including Author, Title, Date, Pertinent Pages, Etc.)

Black et al., Can sucrose cleavage enzymes serve as markers for sink strength and is sucrose a signal molecule during plant sink development? In: Pontis HG, Salerno GL, Echeverria EJ (eds), Sucrose Metabolism: Biochemistry, Physiology and Molecular Biology. (1995), Waverly Press, Baltimore, MD, pp 49-64. ISBN 0-943088-32-3.

Botha et al., Isolation and Characterization of pyrophosphate: D-fructose-6-phosphate 1-phosphotransferase from cucumber seeds. (1986), Plant Cell Physiology 27: 1285-1295.

Botha et al., Activity of key enzymes involved in carbohydrate metabolism in Phaseolus vulgaris cell suspension cultures. (1992), Plant Cell Physiology 33: 477-483.

Bugos et al., RNA isolation from plant tissues recalcitrant to extraction in guanidine. (1995), BioTechniques 19: 734-737.

Carlisle et al., Pyrophosphate-dependent phosphofructokinase. Conservation of protein sequence between a-and B-subunits and the ATP dependent phosphofructokinase. (1990), Journal of Biological Chemistry 265: 18366-78371.

Carnal et al., Pyrophosphate-dependent 6-phosphofructokinase, a new glycolytic enzyme in pineapple leaves. (1979), Biochemical and Biophysical Research Communications 86: 20-26.

Chamberlain et al., The use of the Emu promoter with antibiotic and herbicide resistance genes for the selection of transgenic wheat callus and rice plants. (1994), Austral J Plant Physiol 21: 95-112.

Edwards et al., Sucrose partitioning in developing embryos of round and wrinkled varieties of Pisum sativum. (1986), Phytochemistry 25: 2027-2032.

Finer et al., Development of the particle inflow gun for DNA delivery to plant cells. (1992), Plant Cell Reports 11: 323-328.

Iyler et al., Transgene silencing in monocots. (2000), Plant Mol Biol 43: 323-346.

Kruger et al., Molecular properties of pyrophosphate: fructose-6-phosphate phosphotransferase from potato tuber. (1987), Archives of Biochemistry and Biophysics 256: 273-279.

W.C. Plaxton, The organization and regulation of plant glycolysis. (1996), Annual Review Plant Physiol Plant Mol Biol 47: 185-214

EXAMINER

Russell Kallis

DATE CONSIDERED

7/14/02

RECEIVED

DEC 04 2001

TECH CENTER 1800 2900

*EXAMINER: Initial if citation considered, whether or not citation is in conformance with MPEP Section 609; Draw line through citation if not in conformance and not considered. Include copy of this form with next communication to applicant.
